In general marine parks are not very cooperative to give out specific data on dates of arrival or departure, primarily because the mass media have in the past used this to comment unfavorably on keeping of cetaceans. Occiasionally articles have appeared in journals offering better information and Japanese aquaria were much more willing to share such data than those in other parts of the world. Thus unlike listings for other species, many data in the Cetacea listing show only years or months and not exact dates.

ACKNOWLEDGEMENTS

No reference book was ever the work of one person and I must record my profound gratitude to the following people who have so kindly encouraged and assisted me with historical dates. I am ever grateful to colleagues all over the world for allowing me access to facts from their collections or from conversations. My first thanks must go to Marvin L. Jones for his generous assistance of time and information for my list. He has shared data from the records, he has accumulated from over 59 years of reading and personal examination of zoo records, and helped with the English use in this introduction. I am very grateful to John Edwards of London, England for taking the time to examine the old file cards and the Daily Occurrence books at London Zoo, this has been a great help. I also wish to thank Mitsuhiro Terada of Ueno Zoo, Tokyo, Japan, who helped enormously with my trip to Japan in requesting assistance from other zoological collections in Japan, and especially in having records translated from the Japanese language, without his assistance the trip would not have been the great success it was. My thanks also go to Laurie Bingaman Lackey (International Species Information System-ISIS), who sent me e-mail addresses and contact names of members and non-members of ISIS.

During visits to collections world wide I was given permission to examine historical data in old ledgers and old file cards, and wish to thank among others Ellen Alers (Smithsonian Institution Archives, Washington, D.C., USA), Beth Bahner and Rachael L. De Caro (Philadelphia Zoo, USA), Dr. Gen Bando (Asahiyama Zoo, Asahikawa, Japan), Ludwig Baumgarten (Halle Zoo, Germany), Gretchen Bickert (Phoenix Zoo, USA), Enrique Castillo (Parque de las Leyendas, Lima, Peru), Dr. Vaclav Ceska (Saarbrücken Zoo, Germany), Elspeth Chaplin (London Zoo, England), Germán Corredor (Zoológico de Cali, Colombia), Dr. D.C. My special thanks go to Dr. Khaled Alrasbi (Omani Mammal Breeding Center, Bait al Barakah, Oman), David Armitage (Linton Zoo, England), Barbara Blanchard (Wellington Zoo, New Zealand), Dr. Bernhard Blaszkiewitz and Claus Pohle (Tierpark Berlin-Friedrichsfelde, Germany), Sara Brice (Taronga Zoo, Sydney, Australia), Philip Dammann (Universität Essen, Germany), Masami Furuta (Toba Aquarium, Japan), Jan Haft (Dorfen, Germany), Dr. Claus Hagenbeck (Carl Hagenbecks Tierpark, Hamburg, Germany), Dr. Daimaru Hideshi and Haruo Otsu (Asa Zoo Park, Hiroshima, Japan), Tetsuya Hiratsuka (Tama Zoo Park, Tokyo, Japan), Masako Inoue and Dr. Shimura (Kushiro Zoo, Japan), Kazuyoshi Itou (Inokashira Park Zoo, Tokyo, Japan), Prof. Dr. Dr.h.c. mult. I wish to thank Dr. Rüdiger Dmoch, Curator of Mammals at Frankfurt Zoo, who allowed me for many years to examine the card files of mammals and Dr. Stefan G. Stadler, Curator of Birds at Frankfurt Zoo, who provided me with the ISIS/CMS Specimen Reference CD/DVD which also had the official permission of the ISIS organization.

Many people took the time and trouble to respond to my questionnaire of mammalian longevities. Also to thank to the many zoo directors and curators, registrars and records keepers, and librarians for the assistance they have provided, which helped to make this list possible. Finally I would like to thank everyone, that I cannot individually mention.

Last but not least, special thanks to Dr. Christian R. Schmidt, Director of Frankfurt Zoo, without whose continued encouragement and support this book would not have become a reality.
